APAMEI Monthly International Forum

APAMEI, the Asia-Pacific Association of Methodist Educational Institutions, is hosting its Monthly Online Forum on Education in a (Post) Pandemic World on 2/25 (2/24 in North & South America).

Zoom link: <https://bit.ly/3bucefH-APAMEI>

Date & time: Feb. 25 @ 9:30 India, 12:00 Philippines/Singapore, 13:00 Japan/Korea

Theme: AI Chatbots and Higher Education

The use of and influence of artificial intelligence in education has been an important theme for educators in recent years, but the latest version of ChatGPT has pushed this discussion into the mainstream. AI tools such as ChatGPT have the potential to support students and enhance the learning experience. But educators need to explore both the potential benefits and the challenges that come with this technology. This month's APAMEI Forum brings together experts in the field to examine the pedagogical implications of AI chatbots, discuss the ethical concerns, and explore strategies to ensure that chatbots are used appropriately and effectively in higher education. It is intended to be an opportunity for university faculty, researchers, undergraduate and graduate students to participate in these discussions and learn from each other about the latest developments in ChatGPT and AI chatbots in higher education.

Lectures:

Dr. Young Min Paik, Exc. Director of LEAD Hubs S. Korea, GBHEM, UMC & Yonsei University

"Understanding the True Face of ChatGPT"

Dr. Paul Tsuchido Shew, Institute for Technological & Social Transformation, Aoyama Gakuin University

"Navigating the Challenges and Opportunities of AI Chatbots in Higher Education"
